<u>Claim Amendments</u>

Applicants have amended claims 1-8 and 12-13, cancelled claims 9 and 14-62 without prejudice, and added new claims 63-74. Applicants set forth below a complete listing of the claims with the corresponding status indicated for each claim.

1.   (Currently Amended) A method of imposing ~~groups~~ <u>a plurality</u> of ~~printable~~ pages~~, the pages varying in at least one of dimension and orientation,~~ on <u>a</u> printable sheet[[s]], <u>the plurality of pages including pages of varying size,</u> the method comprising:

~~providing~~ displaying <u>on a display device</u> a representation of [[a]] <u>the</u> printable sheet;

dividing ~~said~~ <u>the</u> printable sheet representation into <u>a plurality of</u> slots~~, each slot adapted to receive a printable page~~;

assigning <u>a printable page to</u> each <u>of the pages to a corresponding</u> slot;

<u>displaying on the display device a representation of the pages in their corresponding slots;</u>

<u>providing a user interface that allows a user to individually specify page</u> ~~setting at least one of~~ alignment, offset and scaling~~, wherein said~~ settings ~~are applicable to one of a current slot, a row of slots, a column of slots and a sheet~~ <u>for each</u> of <u>the</u> slots; and

~~performing any of adding sheets, duplicating a sheet, deleting a sheet and editing a page~~

<u>individually adjusting the page alignment, offset and scaling of each of the pages based on the user specifications.</u>

2.   (Currently Amended) The method of Claim 1, wherein ~~said~~ <u>the</u> scaling settings include any of:

a 'scale to fit' mode;

a 'custom' mode;

a 'fit width mode'; and

a 'fit height' mode.

3.   (Currently Amended) The method of Claim 1, <u>wherein the user interface</u> further ~~comprising rotating~~ <u>allows the user to specify</u> page[[s]] <u>rotation settings</u> on ~~said~~ <u>the printable</u> sheet in ninety degree increments.

4.   (Currently Amended) The method of Claim 1, <u>wherein the user interface</u> further ~~comprising~~ <u>allows the user to specify</u> any of:
       ~~defining~~ sheet size;
       ~~defining~~ creep adjustment;
       ~~defining~~ sheet orientation;
       ~~defining~~ at least one of rows and columns;
       ~~defining~~ printer's marks; and
       ~~defining~~ finishing options.

5.   (Currently Amended) The method of Claim 4, wherein <u>the user interface</u> ~~defining printer's marks comprises~~ <u>further allows the user to specify</u>:
       ~~defining~~ trim marks; and
       ~~defining~~ fold marks.

6.   (Currently Amended) The method of Claim 5, wherein ~~defining~~ <u>specifying</u> trim marks comprises:
       defining horizontal and vertical length;
       defining line type;
       defining line width; and
       defining line color.

7.   (Currently Amended) The method of Claim 5, wherein ~~defining~~ <u>specifying</u> fold marks comprises:
       defining horizontal and vertical length;
       defining line type;
       defining line width; and
       defining line color.

8.   (Currently Amended) The method of Claim 4, wherein ~~defining~~ specifying finishing options comprises:

      defining binding options; and

      defining options for ganged print jobs.

9.   (Cancelled).

10.   (Original) The method of Claim 1, further comprising saving imposition attributes to a template.

11.   (Original) The method of Claim 1, further comprising specifying imposition attributes by applying a template.

12.   (Currently Amended) The method of Claim 1, further comprising previewing ~~said~~ the printable sheet[[s]].

13.   (Currently Amended) The method of Claim 1, wherein ~~previewing said sheets comprises any of~~ the user interface allows the user to:

      ~~editing~~ edit any of ~~said printable~~ the pages; and

      ~~setting~~ set gutter size.

14-62. (Cancelled)

63.   (New) A computer program product for imposing a plurality of pages on a printable sheet, the plurality of pages including pages of varying size, the computer program product comprising computer readable code adapted to:

      display on a display device a representation of the printable sheet;

      divide the printable sheet representation into a plurality of slots;

      assign each of the pages to a corresponding slot;

      display on the display device a representation of the pages in their corresponding slots;

provide a user interface that allows a user to individually specify page alignment, offset and scaling settings for each of the slots; and

individually adjust the page alignment, offset and scaling of each of the pages based on the user specifications.

64.　(New)　The computer program product of Claim 63, wherein the scaling settings include any of:

a 'scale to fit' mode;

a 'custom' mode;

a 'fit width mode'; and

a 'fit height' mode.

65.　(New)　The computer program product of Claim 63, wherein the user interface further allows the user to specify page rotation settings on the printable sheet in ninety degree increments.

66.　(New)　The computer program product of Claim 63, wherein the user interface further allows the user to specify any of:

sheet size;

creep adjustment;

sheet orientation;

at least one of rows and columns;

printer's marks; and

finishing options.

67.　(New)　The computer program product of Claim 66, wherein the user interface further allows the user to specify trim marks and fold marks.

68.　(New)　The computer program product of Claim 67, wherein specifying trim marks comprises:

defining horizontal and vertical length;

defining line type;

defining line width; and

defining line color.

69. (New) The computer program product of Claim 67, wherein specifying fold marks comprises:

defining horizontal and vertical length;

defining line type;

defining line width; and

defining line color.

70. (New) The computer program product of Claim 66, wherein specifying finishing options comprises:

defining binding options; and

defining options for ganged print jobs.

71. (New) The computer program product of Claim 63, wherein the computer readable code is further adapted to save imposition attributes to a template.

72. (New) The computer program product of Claim 63, wherein the computer readable code is further adapted to specify imposition attributes by applying a template.

73. (New) The computer program product of Claim 63, wherein the computer readable code is further adapted to preview the printable sheet.

74. (New) The computer program product of Claim 63, wherein the user interface allows the user to:

edit any of the pages; and

set gutter size.
